

inox *mx2* **BATTERY CONDITIONER**

For Cars, Motorcycles, Boats, Trucks, Buses, Aviation, Farm, Earthmoving & Mining equipment, Forklifts, Industrial, Solar & Stationary Batteries

Up to 2 - 3 times more life for new batteries and new life to older mechanically sound batteries

**DISSOLVES BATTERY KILLING SULPHATION
BETTER AND FASTER COLD MORNING STARTS
CONSTANT BRIGHTER LIGHTS
RAPID POWER RECOVERY AND RECHARGE
HOLDS CHARGE LONGER BETWEEN USE
INCREASES BATTERY EFFICIENCY UP TO 18%**

Approximately 70% of lead-acid batteries over a period of time stop operating because of a build-up of lead sulphate (sulphation) on the plates. Charging the battery does not stop this sulphation from happening. **INOX-mx2 Battery Conditioner** is an electro-chemical catalyst that can be added to any lead-acid batteries to increase the performance and life of the battery.

Adding **INOX-m2 Battery Conditioner** to a lead-acid battery helps stop lead sulphate build up on the plates, increases battery life by up to 2 to 3 times, increases battery efficiency by 18%, gives brighter lights, faster starts & recharge.

INOX-mx2 Battery Conditioner can be added to older batteries providing the older battery has only a sulphate problem and is mechanically sound. It should add another 1 to 2 years to the life of the battery. **INOX-mx2 Battery Conditioner** only needs to be added once in the life of a battery

NB. There is about a 2 - 3% failure rate when adding **INOX-mx2 Battery Conditioner** to batteries that are more than 2 years old.

UP TO 12 MONTHS ADDITIONAL FULL REPLACEMENT WARRANTY ON NEW BATTERIES

When **INOX-mx2 Battery Conditioner** is added to a new battery in the first 2 weeks after purchasing the battery and the completed warranty form is sent to Candan Industries Pty Ltd, there will be an additional full replacement warranty on the battery equal to the battery manufacturer's warranty to maximum of 12 months and will start the day the battery manufacturer's warranty expires.

SIZES: 92ml(single battery), 1, 5 & 20 litre containers.

F.A.Q's. ON INOX-mx2 BATTERY CONDITIONER

What is INOX-mx2 Battery Conditioner.

INOX-mx2 Battery Conditioner is an electro-chemical catalyst that can be added to all lead-acid batteries to increase the performance and life of the battery.

What are the benefits of adding INOX-mx2 Battery Conditioner to a battery.

It helps stop lead sulphate build up on the plates, increases battery life by up to 2 to 3 times, increases battery efficiency by up to 18%, gives brighter lights, faster starts and recharge.

Will INOX-mx2 Battery Conditioner work in older batteries.

Providing the older battery has only a sulphation problem and is mechanically sound, it should add another 1 to 2 years life to the battery. **NB.** There is about a 2 - 3% failure rate when adding **INOX-mx2 Battery Conditioner** to batteries that are 2 years old or more.

What is the INOX-mx2 Battery Conditioners manufacturer's warranty.

When **INOX-mx2 Battery Conditioner** is added to a new battery in the first 2 weeks and the completed warranty form is sent to Candan Industries Pty Ltd, there will be an additional full replacement warranty on the battery equal to the battery manufacturer's warranty to maximum of 12 months and will start the day the battery manufacturer's warranty expires. **EG.** Battery with 6 months battery manufacturer's warranty gets an additional 6 months with the **INOX-mx2 Battery Conditioner** (making 12 months warranty in total). 12 months plus 12 months (24 months in total), 24 months plus 12 months (36 months in total), etc.

NB. The **INOX-mx2 Battery Conditioner** in the 92ml single battery dose for standard batteries up to 100 Amp Hour has the additional warranty only.

NB. INOX Battery Conditioner is not a cure all it will not fix a mechanically unsound battery.
